

Dr. Cramer attends, presents at Salk Institute

Carole L. Cramer, PhD, Executive Director, Arkansas Biosciences Institute, Arkansas State University, attended the Salk Institute Plant Biology Laboratory 25th Anniversary Symposium, October 14-15, and gave a talk on “Pushing PBIO to the Interface of Agriculture and Medicine.” She included a discussion of the goals, facilities and research clusters within Arkansas State University’s Arkansas Biosciences Institute. Cramer also highlighted results from her research groups’ experiments in using plant lectins as potential carriers of medical and veterinarian proteins. The Salk Institute for Biological Studies is located in La Jolla, California and its major areas of study include: Molecular Biology and Genetics; Neurosciences; and Plant Biology.
